Lines of Credit

- **Bankers MedFi has been assisting pharmacies for over 10 years with its cash flow solutions.**

We believe every growing pharmacy needs an AR line to facilitate its growth and here are the top 3 reasons:

- 1. Get cash upfront for claims instead of waiting to get paid from insurance carriers.**
- **2. Medication costs can be very high. Improved cash flow will allow a pharmacy to pay wholesalers faster, allowing the pharmacy to qualify for early payment discounts. In some cases, these discounts cover the cost of the AR line.**
- 3. An AR line is much cheaper than equity and less restrictive than a bank loan.**
